

Project: West End Penthouse

Location: London West End

Objective of Project: The site was formerly a dilapidated shell on the roof of a building in the heart of the West End of London. This 3000 sqft space was transformed into a stunning minimalist penthouse apartment. The focus was on creating an inside-outside space. Through the use of a set of sliding doors, which could be fully opened, these allowed for the interior and exterior spaces to be united. The main living space also benefited from a retractable roof light which could be opened on warm days. Floor to ceiling glazing coupled with a white resin floor and white finishes also maximised the fantastic natural light that the space benefited from.

Perfection with a personal touch
